

## Site Navigation

The primary objective of this site is to provide useful information for those selecting a nursing home. To this end we provide downloadable documents on our home page that can be used in discussions with a prospective nursing home.

Also, there are Health Topics that cover many subjects and Other Topics that include videos and photo albums along with other subjects.

After viewing a PDF document to return to site click ← at the top left of screen.

After entering a starting location, the search box in the home page you will enter the facilities ratings page which will display all the facilities within a 25 mile radius of your starting location, a default distance. Follow the instructions above the listings for viewing the Websites, Road Maps and Inspection Reports.

To view a brief description of the ratings mouse over of the **?** Do not rely only on the ratings.

[Modify Results](#)

You will see the various options:

- Change starting Location
- Distance from starting location to facility - 5 to 100 miles from dropdown list
- Overall Ratings Listings. Remove appropriate default check marks

The government ratings are clearly an important factor to consider in choosing a facility, but other factors also warrant your attention.
